WORK HISTORY

- **DSFH Mobile App API Development | Fakeeh Technologies Private Limited**
  Implementation of WebAPI for DSFH Mobile App which helps the patients to Book Appointment for consultation, radiology, Medicine Stock Check, SMS and PUSH Notification send for Android and IOS Mobile users, and Enhancing the current features.
  Role: Requirement collection, Analysis, Development, Manual Testing and Implementation.
  Domain: Hospital & Healthcare.
  Technologies Used: C#, ADO.NET, DotNet Framework, Web API, Windows Services, ORACLE SQL Developer, EF, MVC 5, WCF, FCM.

- **KAUST Mobile App API Development | Fakeeh Technologies Private Limited**
  Implementation of WebAPI for DSFH Mobile App which helps the patients to Book Appointment for consultation, radiology, Medicine Stock Check, SMS and PUSH Notification send for Android and IOS Mobile users, and Enhancing the current features.
  Role: Requirement collection, Analysis, Development, Manual Testing and Implementation.
  Domain: Hospital & Healthcare.
  Technologies Used: C#, ADO.NET, DotNet Framework, Web API, Windows Services, ORACLE SQL Developer, EF, MVC 5, WCF, FCM.

- **Almoosa Mobile App API Development | Fakeeh Technologies Private Limited**
  Implementation of WebAPI for DSFH Mobile App which helps the patients to Book Appointment for consultation, radiology, Medicine Stock Check, SMS and PUSH Notification send for Android and IOS Mobile users, and Enhancing the current features.
  Role: Requirement collection, Analysis, Development, Manual Testing and Implementation.
  Domain: Hospital & Healthcare.
  Technologies Used: C#, ADO.NET, DotNet Framework, Web API, Windows Services, ORACLE SQL Developer, EF, MVC 5, WCF, FCM.

- **DMFH Mobile App API Development | Fakeeh Technologies Private Limited**
  Implementation of WebAPI for DSFH Mobile App which helps the patients to Book Appointment for consultation, radiology, Medicine Stock Check, SMS and PUSH Notification send for Android and IOS Mobile users, and Enhancing the current features
  Role: Requirement collection, Analysis, Development, Manual Testing and Implementation.
  Domain: Hospital & Healthcare.
  Technologies Used: C#, ADO.NET, DotNet Framework, Web API, Windows Services, ORACLE SQL Developer, EF, MVC 5, WCF, FCM.

- **FUH Mobile App API Development | Fakeeh Technologies Private Limited**
  Implementation of WebAPI for DSFH Mobile App which helps the patients to Book Appointment for consultation, radiology, Medicine Stock Check, SMS and PUSH Notification send for Android and IOS Mobile users, and Enhancing the current features
  Role: Requirement collection, Analysis, Development, Manual Testing and Implementation.
  Domain: Hospital & Healthcare.
  Technologies Used: C#, ADO.NET, DotNet Framework, Web API, Windows Services, ORACLE SQL Developer, EF, MVC 5, WCF, FCM.

- **Certificate Monitoring Web-Application | Tata Consultancy Services Limited**
  A web application which monitoring server/IIS certificates expiration and send notification on a pre-defined intervals before expiration to stakeholders.
  Role: Requirement collection, Analysis, Development, Manual Testing and Implementation.
  Domain: Infra Domain.
  Technologies Used: C#, PowerShell, DotNet Core, Web API, MicroService , MSSQL, EF, MVC 5, WCF.

- **Alert/Incident Automation | Tata Consultancy Services Limited**
  A web application which automates Alerts coming from tool and create Incident in the ITSM tool for the respective stakeholders.
  Role: Requirement collection, Analysis, Development, Manual Testing and Implementation.
  Domain: Infra Domain.
  Technologies Used: C#, PowerShell, DotNet Core, Web API, MicroService , MSSQL, EF, MVC 5, WCF, REST API, Python 3.

- **OneClick HelpDesk Toolkit | Tata Consultancy Services Limited**
  A WPF application created for end users to resolve issues related with desktop applications like MSExcel, MSWord, Outlook, etc.
  Role: Requirement collection, Analysis, Development, Manual Testing and Implementation.
  Domain: Infra Domain.
  Technologies Used: C#, PowerShell, DotNet Core, Web API, MSSQL, EF, MVC 5, WCF, REST API, WPF.

- **Shift Roaster & Shift Handover | Tata Consultancy Services Limited**
  A web application created for teams to maintain and managing shifts of their team members, also members can handover their shift work another using shift handover portal.
  Role: Requirement collection, Analysis, Development, Manual Testing and Implementation.
  Domain: Infra Domain.
  Technologies Used: C#, PowerShell, DotNet Core, Web API, MSSQL, EF, MVC 5, WCF, REST API, MSExcel Automation.

SKILLS

- **Programming Language:** C#, PowerShell, Bash.
- **Web Development:** HTML5, CSS3, JavaScript, JQuery.
- **Database:** MSSQL, MySQL, Oracle PL-SQL
- **Frameworks and Tools:** Bootstrap, Postman, Visual Studio 2019, MVC 5, EF , WCF, WPF, SSMS, Oracle SQL Developer, WebAPI ADO.NET, OOPS concept
- **Others:** Azure.
